Massimo Sirelli

Massimo Sirelli is an Italian artist born in Catanzaro in 1981, known for his creations in the field of pop and urban art, often made with recycled materials, especially his distinctive "robots".

His artistic career began in adolescence, influenced by graffiti and street art. After graduating from IED in Turin in Digital and Virtual Design in 2003, since 2008 he has been a teacher at the same institute. He also works as an advertising communications consultant and his works have been recognized in international graphics books.

Sirelli is the founder of the "Adotta un Robot" project, which creates empathetic robots from recycled materials, and of "La mia Calabria è bellissima". He is also an AIRC ambassador and collaborates with the Insuperabili organization. His works have been exhibited in numerous exhibitions and he has collaborated with important brands.
